

Our Values are important in the way we work together as a team

Internal Colleague values

We speak up if something goes wrong, ask questions for clarity and understanding, and we are approachable, fair and honest with others

We speak up if company values are not being followed, we are pro-active and support each other in our work goals and ambitions, and we celebrate our individual, team and company successes.

We are clear in the information we relay to others, taking a common sense approach to all tasks and do not complicate our internal processes.
